Quick- Chief reason for this early a.m. note is to let you know informally and to let Doug know before you get copies of records that there was a Dallas tickler. Don't know if I spotted this earlier and told you.

It is an ~~xx~~ area, that is, the record is, covered by my C.A.75-226, the spectro case.

In addition to what I sent long ago indicating the existence of special files on the so-called critics, I've found one on Mark Lane in Dallas.

The stuff they had there on books has not been processed yet, if they are not withholding it. This was itemized in the response to the TT I sent you, the same place, I think, that I learned of the indices.

I've been able to read more records lately because often Rae is able to get them for me when I'm not able to handle the steps safely, when I'm ~~xxx~~ tired from exercising and then rest.

Feel fine this a.m. Best, HW 4/21/79

P.S. out of franks
